EDUCATION

University of Colorado Boulder

College of Engineering and Applied Science

BS Technology, Arts, and Media

AUG 2016 - DEC 2019

Technology, Arts, and Media is an engineering program that infuses creativity into technology and integrates a technically rigorous education with critical thinking, problem solving, design and creative production.

SKILLS

JavaScript | jQuery
React.js | Redux
Node.js
Swift | Xcode
Java
Kotlin | Android Studio
HTML | CSS | SCSS
GitHub
Internationalization
Adobe Design Suite

PROFESSIONAL EXPERIENCE

CU Boulder · [Mobile App Development Instructor](#) · JAN 2020 - PRESENT

- Teach a course of 15 students with two lectures per week that cover advanced mobile application development concepts for iOS and Android
- Develop the material for the course including lectures, demo apps, assignments, projects, assessments, and schedule
- Topics covered in the course include Navigation models and controllers, MVC design, UI/UX design, accessibility, testing, and data persistence
- Work with students individually during office hours to troubleshoot specific problems

Lingoport, Inc · [Software Engineer](#) · DEC 2019 - PRESENT

- Work with clients to improve the internationalization of their applications and products so that they can easily scale globally and develop with users from different locales in mind

Computational Foundations 1 · [Head Teaching Assistant](#) · JAN 2019 - DEC 2019

- Manage a weekly recitation that introduces students to basic coding concepts through the use of JavaScript and Python resulting in an understanding of the fundamentals of programming
- Develop class specific documentation to provide a concise and relevant reference to students
- Model important concepts via in-class technical demos
- Evaluated student work based on the requirements of the assignment

Lingoport, Inc · [Software Engineering Intern](#) · JUN 2019 - DEC 2019

- Develop and maintain a fully internationalized single page web app for the sales team to use in client meetings to demonstrate the capabilities of company products
- Design and develop systems which integrate third party APIs into the Lingoport internationalization work-flow for automated translation of resource files
- Tech stack includes: JavaScript, Java, Jenkins, Apache Tomcat, and AWS.
